

## **BAWATHANE 777**

BAWATHANE 777 is class155 Polyurethane wire enamel with fast solder ability. It possesses a good cut through and flexibility.

| Physical Properties          |                                   |   |                              |
|------------------------------|-----------------------------------|---|------------------------------|
| Appearance                   | Clear Liquid                      |   |                              |
| Solid Content<br>1g/180ºC/1h | 30 ± 1%                           | 35 ± 1%                                   | 40 ± 1%                      |
| Size mm                      | 0.05 to 0.200                     | 0.2 to 1.0                                | 1.0 to 2.0                   |
| * Viscosity                  | 20 - 30                           | 40-50                                     | 60-80                        |
| ** Viscosity                 | 60 - 100                          | 130 - 170                                 | 250 - 350                    |
